507502/3

> athletic footwear  
for firefighters  
> lightweight

HAIX® Ankle Flex System

HAIX® High Durability Cap System

HAIX® Ankle Protector System

HAIX® Boot Jack

**HAIX® Secura Liner®:**

Footwear inner liner which will never pull out or wrinkle up over time; lining is firmly secured and sealed along with the upper leather beneath the sole.

**HAIX® Sun Reflect Leather:**

Reduces the heating effect of the upper leather. Sunlight is reflected by the leather, keeping the leather and the feet cooler.

**HAIX® Ankle Flex System:**

Ankle Flex System refers to the functionality of a pull-on boot which enables it to adjust to different foot, ankle, and heel shapes providing optimal fit in the boot. Integrated flex-zones ensure high flexibility and prevents pressure points.

**Protective Toe Cap:**

Anatomically formed and well-padded composite protective toe cap to meet ASTM 2413-11 and CAN/CSA Z195-2014 standard for personal protection – protective footwear.

**Upper Material:**

Waterproof leather, hydrophobic, and breathable.

**Moisture Barrier:**

CROSSTECH® footwear, 4 layers, waterproof and breathable, bacteria and chemical resistant, bloodborne pathogen resistant. Highly abrasion resistant and softly padded with breathable fleece.

**Sole:**

Lightweight rubber/PU sole in a sports style with sturdy road/rough terrain profile and enhanced toe-to-heel support; wear-resistant with excellent anti-slip properties - even in cold weather. The lightweight PU shock absorption wedge provides extra walking comfort and excellent thermal insulation. The flame-resistant outer sole is non-marking and offers excellent resistance against heat, oil and fuels. Its bright yellow signal marks are visible even through thick smoke.

**Protective Flexible Midsole:**

Flexible protective stainless steel, cast into the PU midsole, to meet ASTM F2413-11 and CAN/CSA Z195-2014 standard for personal protection – protective footwear.

**Footbed:**

Moisture-absorbent fleece insole.

**Insole:**

Moisture wicking comfort insert with cushioning effect and antibacterial properties. Separate heel cup ensures optimized cushioning and foot guidance. "AIRFLOW" channels. "Perfect-Fit" marking for optimized boot size choice. Washable at 86°F.

**HAIX® Vario Wide Fit System:**

For a more individualized fit, boot fit can be adjusted with an alternate insole. Blue – Narrower fit (thickest), Red – Moderate fit (average thickness), Yellow – Wider fit (thinnest). If boots feel slightly wide, HAIX® recommends using the next thickest insole; or, if slightly narrow, to use the next thinnest insole.

**HAIX® Arch Support System:**

Optimal ankle support and shock absorption in the arch provided by an anatomically formed last; good foot guidance and proper hold thanks to narrow heel and ankle shaft combined with added comfort through broad front foot area.

**Other:**

Reflective strips, profiled toe cap, large boot straps on both sides, shin protection, boot jack

**Extended Wear Program:**

Out of warranty footwear can be refurbished with original factory parts through an extended wear package. This package includes any necessary replacement or repair of stitching, insoles and retreading of soles. Footwear will be cleaned and deodorized. HAIX footwear owners have the option of a sole retread or toe cap replacement only.
