YOU ARE NOW ENTERING THE

REDZONE™

Particulate-Blocking Hood & Contaminant Control Package

When tones drop and you arrive on the scene of a fire, your turnout gear and hood are immediately exposed to a number of toxic chemicals – exposure that can result in serious health problems. That includes cancer, which is currently the leading cause of U.S. firefighter deaths. With that fact in mind, LION has developed RedZone™, our exclusive PPE contaminant control package.

LION's RedZone Particulate-Blocking Hood protects one of the most vulnerable areas of your body by blocking contaminants from touching your head or neck. Its streamlined, two-layer construction features StedAir® PREVENT particulate blocker for outstanding contaminant protection, wash after wash. The RedZone hoods also offers exceptional breathability, comfort and mobility. And it doesn't restrict your hearing during firefighting activities.
